by [Chris Pizzolo](#)

“Marble Words” is the latest release from [Jake SM](#), the [Newlywed Records](#) artist based out of Brooklyn New York. The track features bouncy 808 style beats, and an easy going vocal performance that makes this song the perfect mid-day chill track.

“Marble Words” also comes complete with a brilliant music video created by Jake. The video is a nearly 4 minute stop motion-esque journey from the creative space where instruments live to the creative space where the creative lives.

Juxtaposing the creative “process” over a myriad of backdrops, the video, for me, chronicles the process of expelling cherished memories onto a canvas of artistic expression. Almost like uploading your most vivid memories to a cloud of self identity, Jake’s Marble Words video gives a rich synthetic texture to his smooth song.

If there’s one video you watch today, [this](#) needs to be it!
